

IZ all-time-point Top enriched terms

- Rhythmic process
- Ion channel transport
- Triglyceride metabolism
- Locomotory behavior
- Antimicrobial humoral immune response mediated by antimicrob
- Negative regulation of interleukin-10 production
- Neutrophil migration
- Monoatomic cation transmembrane transport
- Mucin type O-glycan biosynthesis
- Multicellular organismal response to stress
- Multi-multicellular organism process
- Cell-cell signaling
- Visual perception
- Cellular response to oxidative stress
- Pancreatic secretion
- Chloride transmembrane transport
- Phosphatidylcholine metabolic process
- GPCR ligand binding
- Regulation of membrane potential
- Regulation of trans-synaptic signaling
